Laboratory Quality Policy

LAB and Field provides materials testing services to the civil construction and mining industries and aims to be the leading provider of Construction Materials Testing.

Through its employees, LAB and Field is dedicated to:

- Supplying expert technical support and product testing to the civil construction and mining industries.
- Providing practical and cost-effective solutions to clients' problems.
- Ensuring timely delivery of testing results to meet clients' requirements.
- Providing quality service and solutions to assist clients with achieving their goals

In providing services to clients, LAB and Field conforms to legal and statutory safety practices and strictly adheres to specified standards with respect to ethical and professional business practices.

LAB and Field's greatest asset is its human resources and it is committed to building a culture and working environment that fosters well-being whilst providing opportunities for on-going learning and advancement of its people.

LAB and Field is committed to quality and the continuous improvement of its systems and processes and understanding and fulfilling our customers' requirements by providing expertise to meet and exceed their requirements in accordance with contractual agreements. LAB and Field achieves this by strict adherence, by all employees, to the policies and procedures of our quality system in accordance with AS ISO/IEC 17025, Australian Standard and Road Authority Test methods, NATA rules and other relevant statutory requirements.

These objectives are met by ongoing feedback by the Laboratory Management Team to the Managing Director with an overview provided by the board of Directors.

A copy of the NATA requirements and scope of accreditation is located in the administration area and is readily available to all staff.

Approved:

Darren Hill
General Manager
